

## MNI POLITICAL RISK ANALYSIS – Global COVID-19 Tracker – September 28

by Tom Lake

## **COVID-19 Trends and Developments**

- India's caseload crosses the six million mark on September 27, just two days after the US reached seven million cases. The two countries are the worst-hit worldwide with regards to cases, accounting for 39.9% of the global total. When combined with the third worst-hit country, Brazil, the three account for 54.2% of global cases and 44.3% of COVID-19 fatalities.
- France is set to enact a new series of COVID-19 restrictions on September 28 as the number of new cases continues to rise, notably in the country's large cities. French authorities do not release full data for new cases over the weekend, but an additional 16,132 cases were added to the total on September 25. The new restrictions affect 12 cities, including Paris, where bars will be forced to shut and the sale of alcohol banned from 10pm, and Marseille, which has been put on a state of maximum alert with all bars and restaurants closed since Saturday.
- Canada recorded and average of 1,370 new cases per day over the past seven days.
   This is the highest weekly average since May 9. The spike in cases has not translated into an escalation in fatalities, which have remained stable at an average of seven per day over the past week. The two most populous provinces (Ontario and Quebec) remain the centres of the outbreak, as was the case in the first wave of infections earlier in the year.

## Chart 1. COVID-19 Cases and Fatalities, Nominal and % Chg Day-to-Day (5dma)

## Chart Pack: COVID-19 Cases and Fatalities, Nominal and % Chg Day-to-Day (5dma)

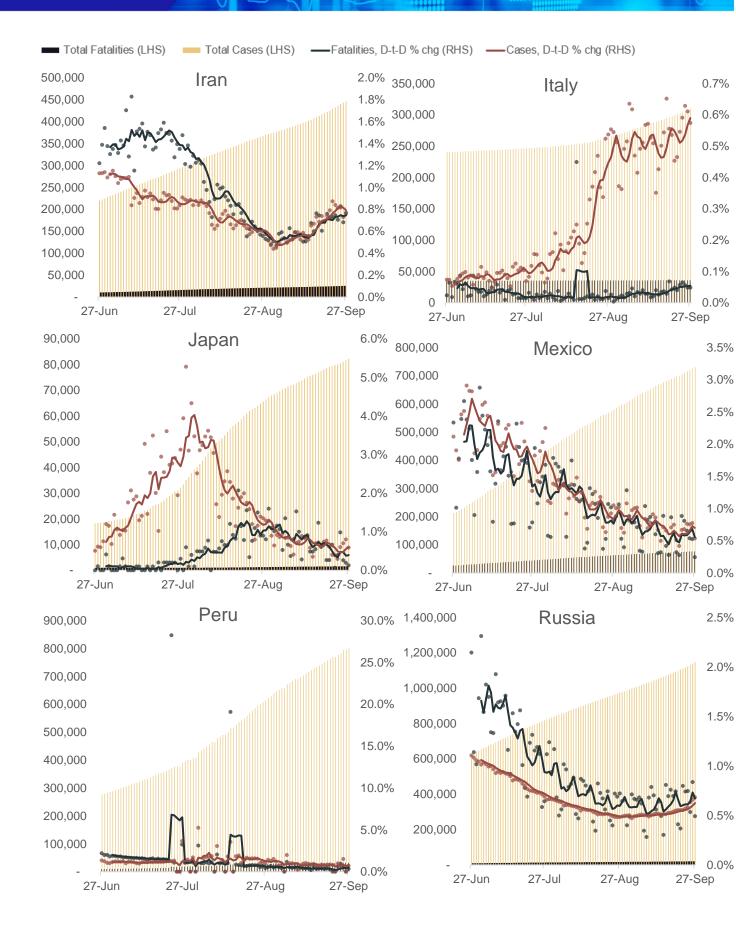

The chart pack below records the number of COVID-19 cases and fatalities resulting from COVID-19 recorded in select countries over the past three months in each respective country. The charts also display the rate of increase in recorded cases and fatalities in each country. **Legend below can be used for all national charts.** 

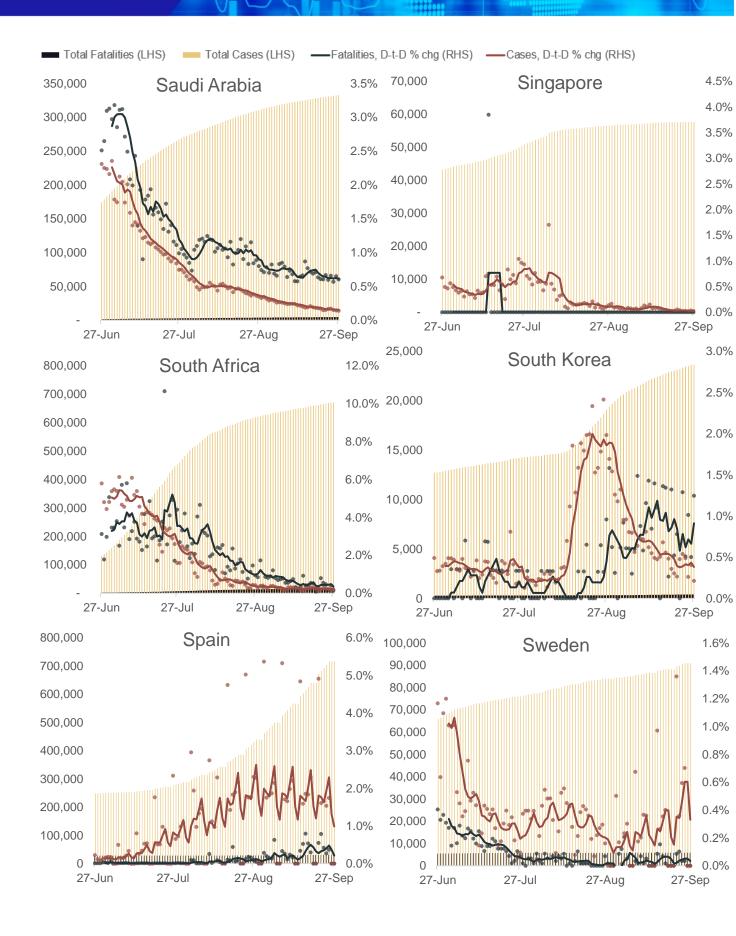

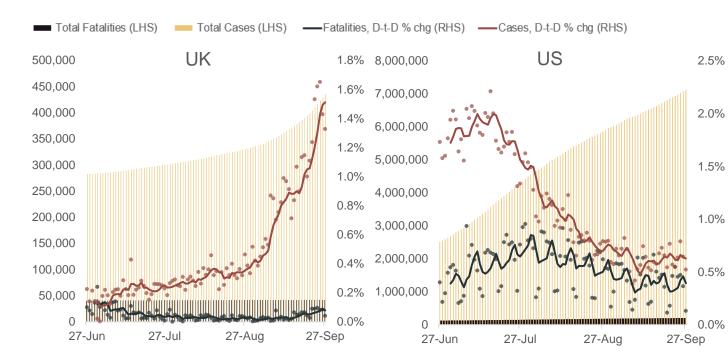

Source: JHU, MNI. N.b Global legend applies to all charts. All data correct as of 0600BST September 28, and represents full-day data submissions, rather than intra-day figures. Each dot indicates the data from a single day.

Chart 2. Countries with 10 Highest Number Of New Cases In Past 24 Hours

Source: JHU, MapChart.net, MNI. N.b. Data from Sep 27. Countries in descending order of new cases: India, US, Brazil Argentina, Russia, Colombia, UK, Peru, Israel, Mexico

Chart 3. Countries with 10 Highest Number of New Cases Per Capita in Past 24 Hours

Source: JHU, Mapchart.net, MNI. N.b. Data from Sep 27. Countries in descending order of new cases per capita: Israel, Bahrain, Oman, Argentina, Montenegro, Peru, Lebanon, Tunisia, Colombia, Cape Verde. Countries with population below 100k excluded.

Chart 4. Countries with 10 Highest Number of Total Recorded Cases Per 100 Head of **Population** 

Source: JHU, Mapchart.net, MNI. N.b. Data for Sep 27. Countries in descending order of new cases per capita: Qatar, Bahrain, Israel, Panama, Peru, Kuwait, Chile, Brazil, US, Oman. Countries with population below 100k excluded.

Chart 5. Countries with 10 Highest Number Of Fatalities In Past 24 Hours

Source: JHU, Mapchart.net, MNI. N.b. Data from Sep 27. Countries in descending order of fatalities in past 24 hours: India, Brazil, US, Argentina, Iran, Colombia, Mexico, Peru, Russia, Indonesia.

Chart 6. Countries with 10 Highest Number of Fatalities Per Capita in Past 24 Hours

Source: JHU, Mapchart.net, MNI. N.b. Data from Sep 27. Countries in descending order of fatalities per capita: Comoros, UAE, Oman, Argentina, Panama, Colombia, Peru, Libya, Paraguay, Israel. Countries with population below 100k excluded.

Chart 7. Countries with 10 Highest Number of Total Recorded Fatalities Per 100 Head of State's Population

Source: JHU, Mapchart.net, MNI. N.b. Data from September 24. Countries in descending order of fatalities per capita: Peru, Belgium, Spain, Bolivia, Brazil, Chile, Ecuador, UK, US, Italy. Countries with population below 100k excluded.
